Description

The Elan Spectrum 85 Skis are built for skiers who want to be able to ski wherever the snow looks the best. The 85 waist width is super versatile, allowing you to conquer the groomers and even venture off into the soft snow if it looks good. Elan's signature Amphibio profile uses traditional camber on the inside edge for good grip, and a rocker design on the outside edge for quick turns, and float. The Power Woodcore improves torsional rigidity, which helps the Spectrum 85's stabilize and reduce vibrations.

Features:

- Design: All-Mountain
- Ski Dimensions: 127-85-110mm
- Turn Radius: 16.3m (size 176)
- Amphibio Left and Right: Camber on inside edge, Rocker tip & tail on outside edge.
- Bindings: Bindings not included
- Power wood core keeps these skis strong and lively
- PST sidewall / cap construction for light weight and smooth turning
- Fiberglass insert reduces ski weight
