Description

The Elan Twilight 90 is a ski built for dynamic lady skiers who love winter. These all mountain skis have lightweight technology features built into them, like Elan's WaveLight torsional system that optimizes flex and stability. The Trulite Woodcore on the Elan Twilight 84 is built specifically for women's skis. The Flat plate design and early rise rocker profile make turn initiation a breeze with the added bonus of easy edge to edge transitions and stability in fresh powder and soft snow conditions.

Side-cut: 129-90-114. Turn Radius: 14.3m
