Description

The mother of all comfort boots, the Atomic Live Fit 100 Ski Boots is a mid-stiff version of the high volume boot design that has given so many wide-footed skiers relief. Roomy at 102 mm in the forefoot with a relaxed instep dimension, the Live Fit expands to fit even wider feet up to 106 mm at two soft Live Fit areas on the side of the boot. Just say no to torturing your wider feet with conventional boots and say yes to foot bliss with the Live Fit 100.
